

The challenge of a software project

+ Content

The ongoing digitalization offers organizations excellent chances to react on changing market conditions proactively. Often this requires the advent of new software solutions. This workshop shall offer you a full overview about the necessary fundamentals for project methodic and for the selection of the right software provider. The approach of the workshop is, to offer you the necessary knowledge and tools to make the selection and the implementation of software successful. You will learn how you find the right software for your company, plan and manage the projects efficiently and successfully implement them.

+ Target Group

Entrepreneurs and management, project managers for software projects, digitization managers, process managers, decision-makers, and participants in software projects from specialist departments and IT.

+ Customization

Together, we tailor the agenda to the specific needs of your company – both in terms of duration and content. You also have the option to conduct the seminars either on-site or conveniently online.
