Project Description:

In this project, GCS was responsible for the planning and operational support of the warehouse logistics relocation for a premium fashion retailer.

The client was seeking a solution to transfer their logistics operations to a new facility.

GCS first developed a concept for the logistics areas and processes and established a detailed project plan.

Vendor offers were carefully reviewed and awarded.

In addition, construction and installation plans were created and monitored to ensure successful implementation of measures such as setting up shelving and hanging garment systems, establishing infrastructure, and integrating IT systems.

The GCS team supervised all implementation activities as well as the operationalization of workflows by management and staff.

After the relocation, the process was stabilized during a subsequent "Get-Well" phase and transitioned into the client's regular operations.
