Digital Product Passport

Regulation or
Growth
Opportunity ?

Growth Opportunity Timeline

You decide what & how to communicate

Upgrade your Care Label Infrastructure

Closing Data Flow and Interconnection gaps in your IT Landscape

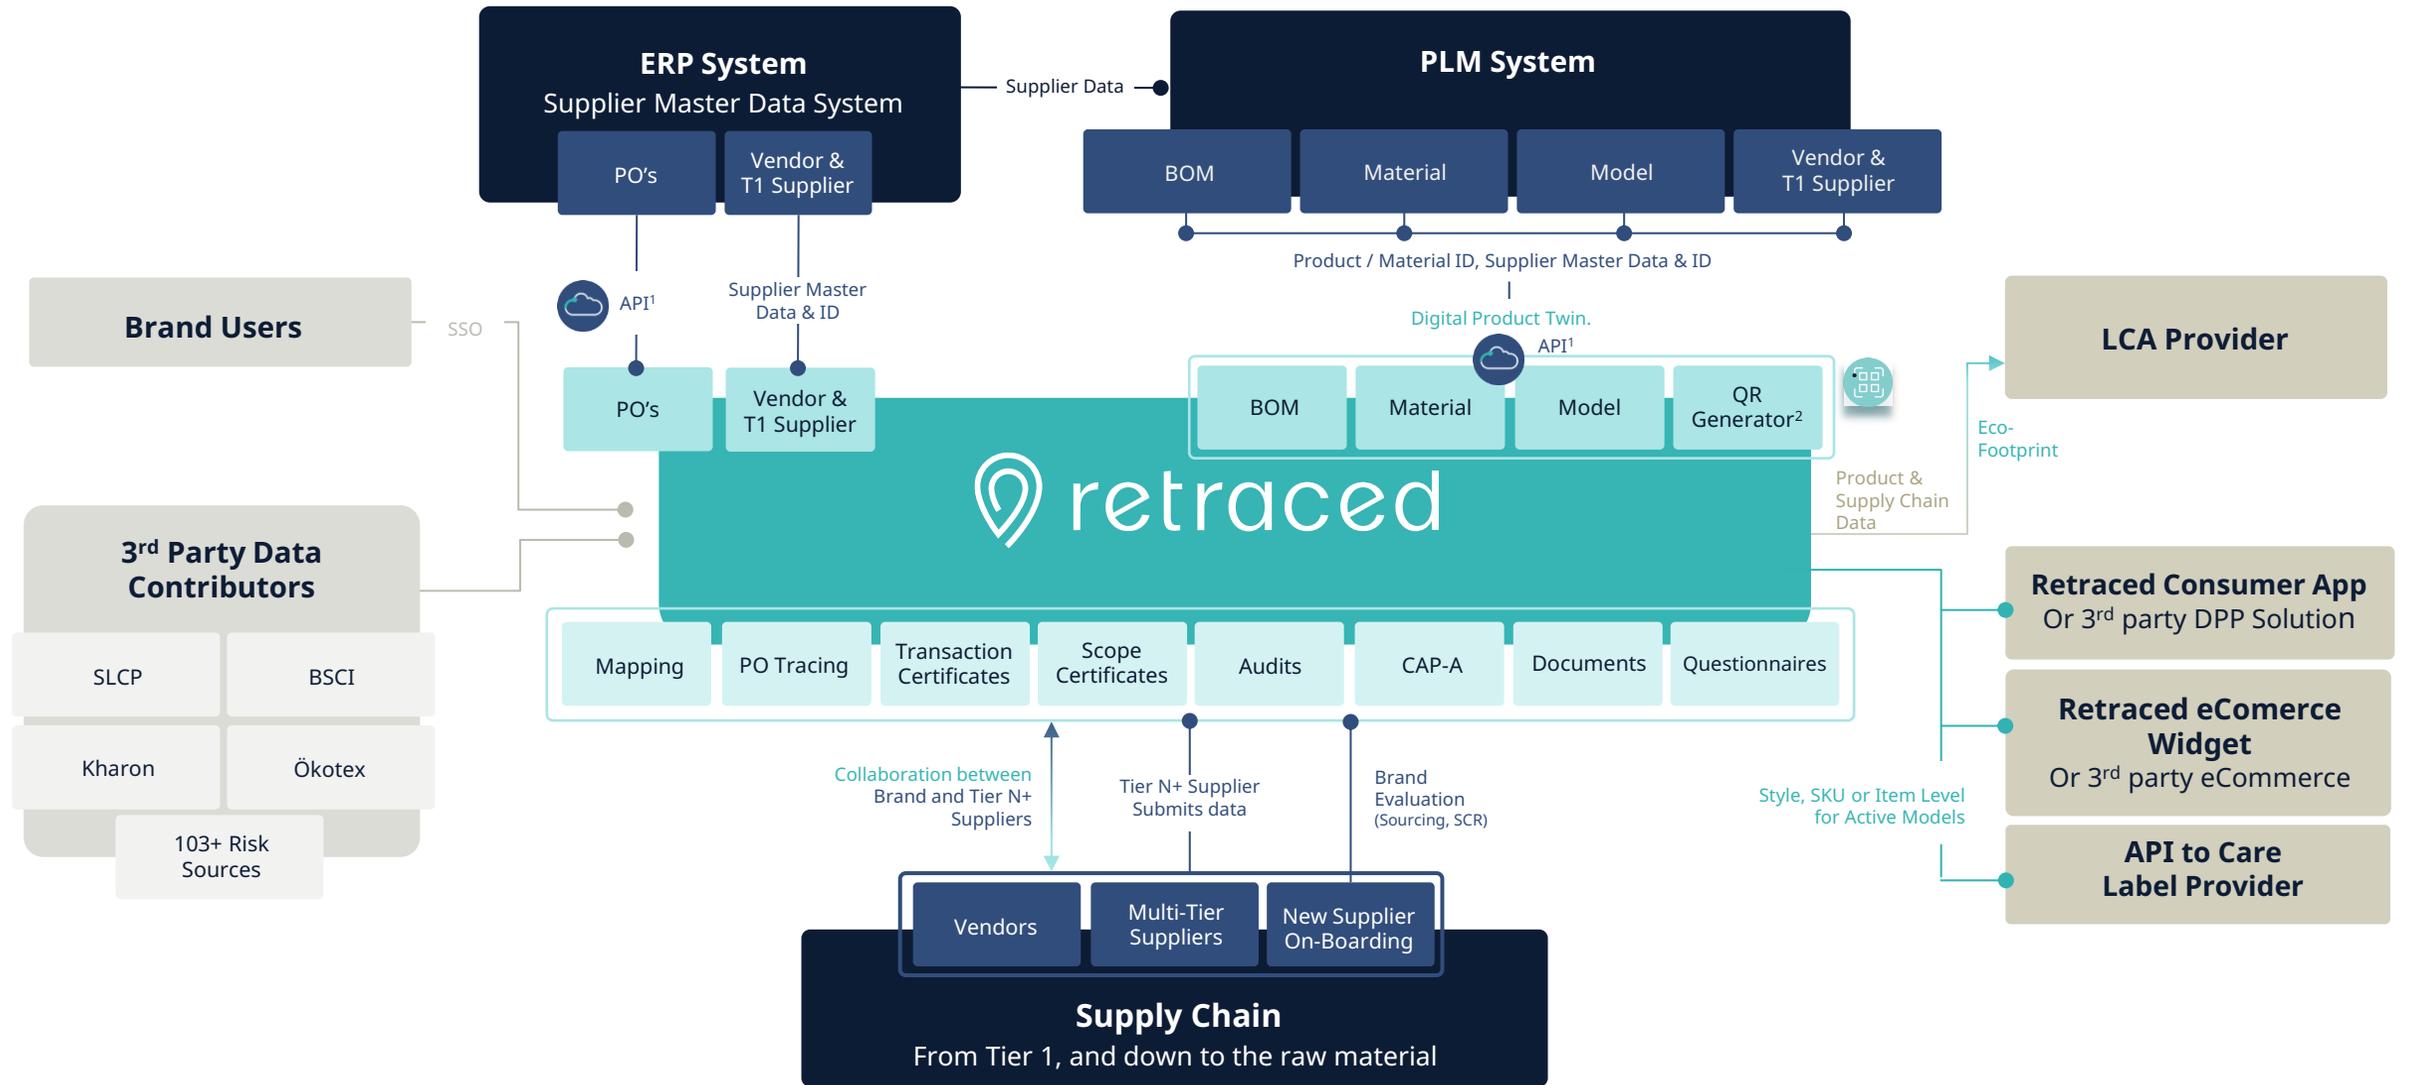

It's about your competitive advantage

**75% of Retraced Clients are starting
DPP Project in 2026...**

Typical - IT Landscape - DPP Enablement with Retraced

1. REST API's Push Data to Retraced, Pull Data from Retraced
2. QR Code generated & hosted by Retraced or by Care Label Provider

Challenge your Brand

18 Month to explore, test and identify the best set-up for your brand

.... Before regulation kicks in and will dictate the rules.

Challenge 1: Care Label Infrastructure

- QR-Code
- RFID
- TwinTag

Cheapest?
Counterfeiting?
Consumer Interaction?
Loyalty App Integration?

Challenge 2: IT-Landscape & Data Quality

Target Architecture

- Where is relevant Data, how is relevant data quality,
- Model dataflow and time sequence

Challenge 3: Marketing

DPP enables a new dimension of story telling and B:C engagement

Is your storytelling per Style ready?

Has your marketing team explored the possibilities?

Prove Your Commitment with DPP

- Provide information and communicate your transparent supply chain and sustainability efforts to your clients with our Digital Product Passport feature.
- Report your compliance to relevant stakeholders (NGOs, government, or clients) and minimize your compliance risks.
- Build trust among clients through your commitment and impact to increase the value of your supply chain and final garments.

End Consumer Communication

The screenshot shows the 'Product's Journey' section of the DPP app. At the top, there is a map of the Arctic region with location pins. Below the map is a navigation bar with 'Journey', 'Products', and 'Badges' icons. The main content area is titled 'Discover your Product's Journey' and lists 'Steps & Processes' with 7 items:

- Raw material processing** (Refining and supplying material.) - x
- Ginning mill** (Ginny's ginners, Mumbai, India) - x
- Yarn processing** (Spinning raw material into yarn.) - +
- Spinning mill** (Spinning Mills Ltd., Qingdao, China) - +
- Fabric processing** (Processing and turning yarn into fabric.) - x
- Weaving mill** (Ankara Weaving Company, Ankara, Turkey) - +
- Knitting mill** (Dennis' Denim, Adana, Turkey) - +

The screenshot shows the 'Puffer Jacket Boden Dark Green' product page in the DPP app. At the top, there is a navigation bar with 'Journey', 'Products', 'Badges', and 'Eco' icons. Below the navigation bar is a circular image of the jacket. The product name is 'Puffer Jacket Boden Dark Green'. Below the product name, there are two sections:

- Recycled content**: If the product is made from recycled materials. A bar chart shows 85% Post-consumer recycled Polyester.
- Microplastics**: If the product releases plastic microfibers into the environment when washing. A bar chart shows 85% Post-consumer recycled Polyester and 15% Polyester.

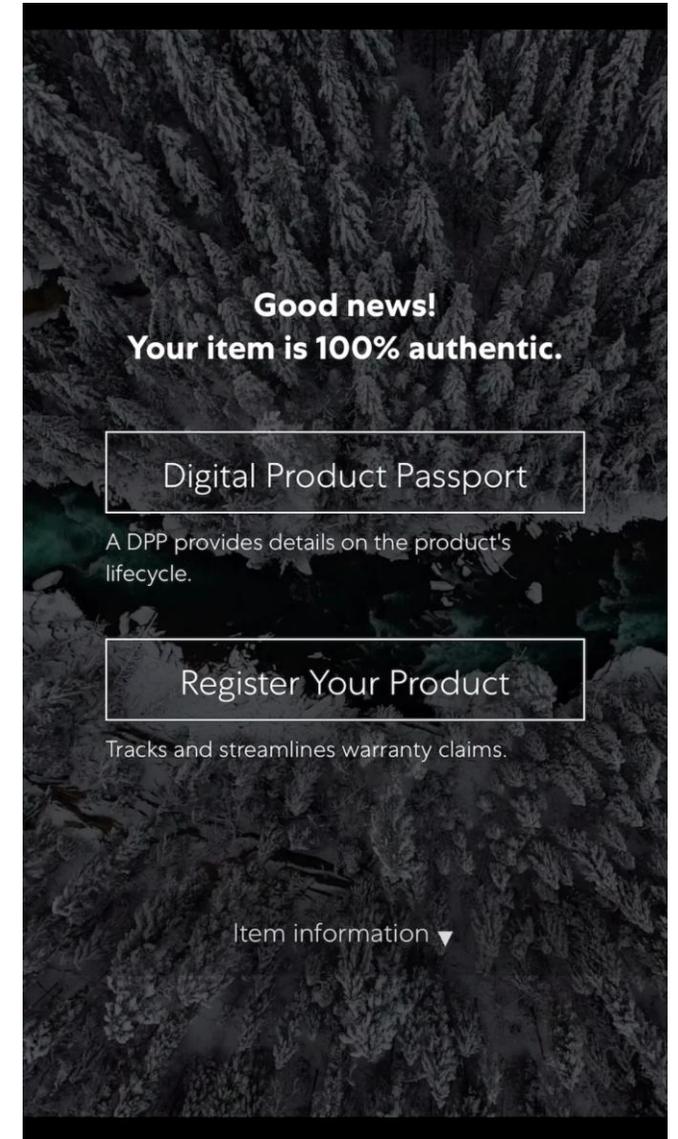

R-Pac < > Retraced

Proving the potential of the DPP, today!

Digital Product Passport (DPP) Solution for Moose Knuckles in partnership with R-Pac

- + Scale Traceability & Supply Chain Due Diligence
