

Intralogistics & Last Mile

+ Content

Intralogistics and warehouse logistics are core components of modern supply chains and play a crucial role in the efficient handling of material flows within an organization. In this seminar, we examine the fundamental concepts of intralogistics and warehouse logistics and their relevance in today's business environment. We also discuss the challenges and opportunities associated with integrating these technologies, as well as the qualifications required to implement them successfully.

The objective is to equip you with practical solutions, knowledge, and tools that you can directly apply within your company to optimize logistics processes and successfully implement a WMS.

+ Target Group

This seminar is designed for Managing Directors, Supply Chain Managers, and Logistics Managers who wish to deepen their expertise in intralogistics and warehouse logistics.

+ Customization

We tailor the agenda to the specific needs of your organization—both in duration and content. You may also choose whether the seminar is conducted on-site or online.

+ Agenda
