

Introduction & Use of WMS

+ Content

A Warehouse Management System (WMS) is a central tool for managing and optimizing warehouse processes. This seminar provides an in-depth look into the implementation and use of WMS. You will gain insights into key functions and capabilities to increase efficiency and accuracy in warehouse operations.

We will discuss current trends and developments in the WMS market and demonstrate how these can contribute to supply chain optimization. In addition, we will address implementation challenges and best practices, including integration with existing systems and employee training.

The objective is to equip you with the knowledge and tools needed to successfully introduce and utilize a WMS in your organization.

+ Target Group

This seminar is designed for Managing Directors, Supply Chain Managers, and Logistics Managers who plan to implement or optimize a Warehouse Management System within their organization.

+ Customization

We tailor the agenda to your organization's specific needs—in both duration and content. You may also choose whether the seminar is conducted on-site or online.
